DETAILED ACTION

1. Claims 1-18 of U. S. Application 10/517,792, filed 12/14/2004, are pending.

Specification

2. The specification does not comport with standard US format. For example, there is no distinction between the background of the invention and the summary of the invention. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
- (1) Field of the Invention.
- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

Art Unit: 2128

Claim Objections

3. Claims 1-18 are objected to because of the following informalities: all claims recite numbers that correspond to figure elements and/or the specification. This appears to be an improper "means for" construction and does not comport with standard US practice. Such recitations are provided no patentable weight.

- 4. Please keep the following in mind when amending:
- A 112 6th invocation by the Applicants requires they meet the following 3-prong test:
- (A) the claim limitations must use the phrase "means for " or "step for;
- (B) the "means for " or "step for " must be modified by functional language; and
- (C) the phrase "means for " or "step for " must not be modified by sufficient structure, material or acts for achieving the specified function.

Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: those related to, for example, "solving problems", "identify a possible problem", "receiving a user action", "providing assistance".
- 7. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language.

 These claims are omnibus type claims. This is due in part to the use of terms such as

Art Unit: 2128

"solving problems", "identify a possible problem", "receiving a user action", "providing assistance". The metes and bounds of the claimed invention are impossible to determine.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Krause et al. (Applicant's IDS).
- Krause et al. discloses :
 - 1. A method for solving problems that are related to geometrical properties of objects (36, 40) processed by a CAD program (10), said method comprising the following steps performed by a computer:

identifying a possible problem related to a geometrical property of at least one object (36, 40) processed by said CAD program (10) [abstract; see entire paper],

displaying an indicator symbol (26, 52) in a drawing window (12) of said CAD program (10), said indicator symbol (26, 52) being shown in graphical association with at least one entity (20, 24, 38, 50) processed by said CAD program (10), said entity (20, 24, 38, 50) being related to said identified possible problem [sections 3-4. See fig. 5-6],

receiving a user action related to the indicator symbol (26, 52) [sections 3-4; fig. 5; pg. 252 - col. 2],

providing problem solving assistance to the user in response to said user action [section 5; fig. 5; pg. 252 - col. 2].

- 2. The method of claim 1, wherein said problem solving assistance provided to said user comprises presenting said user with at least one problem solving command [sections 3-4; fig. 5; pg. 252 col. 2].
- 3. The method of claim 2, wherein said problem solving command is only executed in response to a further user action [sections 3-4; fig. 5; pg. 252 col. 2].

4. The method of claim 1, wherein said problem solving assistance provided to said user comprises presenting said user with a description of said possible problem [sections 3-4; fig. 5; pg. 252 - col. 2].

- 5. The method of claim 1, wherein said possible problem is identified by the computer during execution of an operation of said CAD program (10) [sections 3-4; fig. 5; pg. 252 col. 2].
- 6. The method of claim 5, wherein said operation of said CAD program (10) is a dimensioning operation [sections 3-4; fig. 5; pg. 252 col. -2].
- 7. The method of claim 1, wherein said possible problem is identified in response to an initial user action indicating at least one problem-related entity (50) processed by said CAD program [sections 3-4; fig. 5; pg. 252 col. 2].
- 8. The method of claim 1, comprising the further steps of: determining whether or not the problem has been solved, and removing the indicator symbol (26, 52) if the problem has been solved [sections 3-4; fig. 5; pg. 252 col. 2].
- 11. Claims 9-18 are rejected for the same reasons.
